

Membrane filter cartridge Candefilt® - HMVE

Hobra introduces the new Candefilt® - HMVE, where the „E“ stands for Evolution, reflecting advancements in resistance and performance.

Compared to other similar cartridges on the market, including HMV cartridges, Candefilt® - HMVE offers:

- A larger effective filtration area, leading to a higher filtration capacity
- Increased bacterial retention capacity
- A higher flow rate
- Greater temperature resistance
- Improved construction and enhanced mechanical durability
- HMVE cartridges are available in 0.45 µm and 0.65 µm porosity, in 10" and 30" sizes
